

the Usual Suspects

No matter where they come from, in the right habitat reptiles can adapt to most any location.
Can you guess which of these reptiles **originate in desert climates?**

1

BEARDED DRAGON

☐ desert ☐ tropical

2

BALL PYTHON

☐ desert ☐ tropical

3

LEOPARD GECKO

☐ desert ☐ tropical

4

VEILED CHAMELEON

☐ desert ☐ tropical

5

EYELASH CRESTED GECKO

☐ desert ☐ tropical

6

CORN SNAKE

☐ desert ☐ tropical

7

GREEN ANOLE

☐ desert ☐ tropical

8

PINK TOE TARANTULA

☐ desert ☐ tropical

PETSMART

ANSWERS

1: Bearded Dragon - Desert
2: Ball Python - Tropical
3: Leopard Gecko - Desert
4: Veiled Chameleon - Tropical
5: Eyelash Crested Gecko - Tropical
6: Corn Snake - Tropical
7: Green Anole - Tropical
8: Pink Toe Tarantula - Desert

heat lamp
terrarium
water dish
uvb light
food
hygrometer

Did you know?

Reptiles are "ectothermic," which means cold-blooded, meaning they rely on the sun (or heat lamps in their habitat), to maintain their body temperatures.

Bearded dragons can move their arms as if waving "hello" which actually means "I don't want to fight you."

When threatened, **ball pythons form a tight ball with their body**, with their head at the center, thus earning them their common name.

A **chameleon can extend its tongue** to nearly the length of its entire body!

Reptile Shopping Roundup

To learn more about how to build your reptile's dream house, click here.

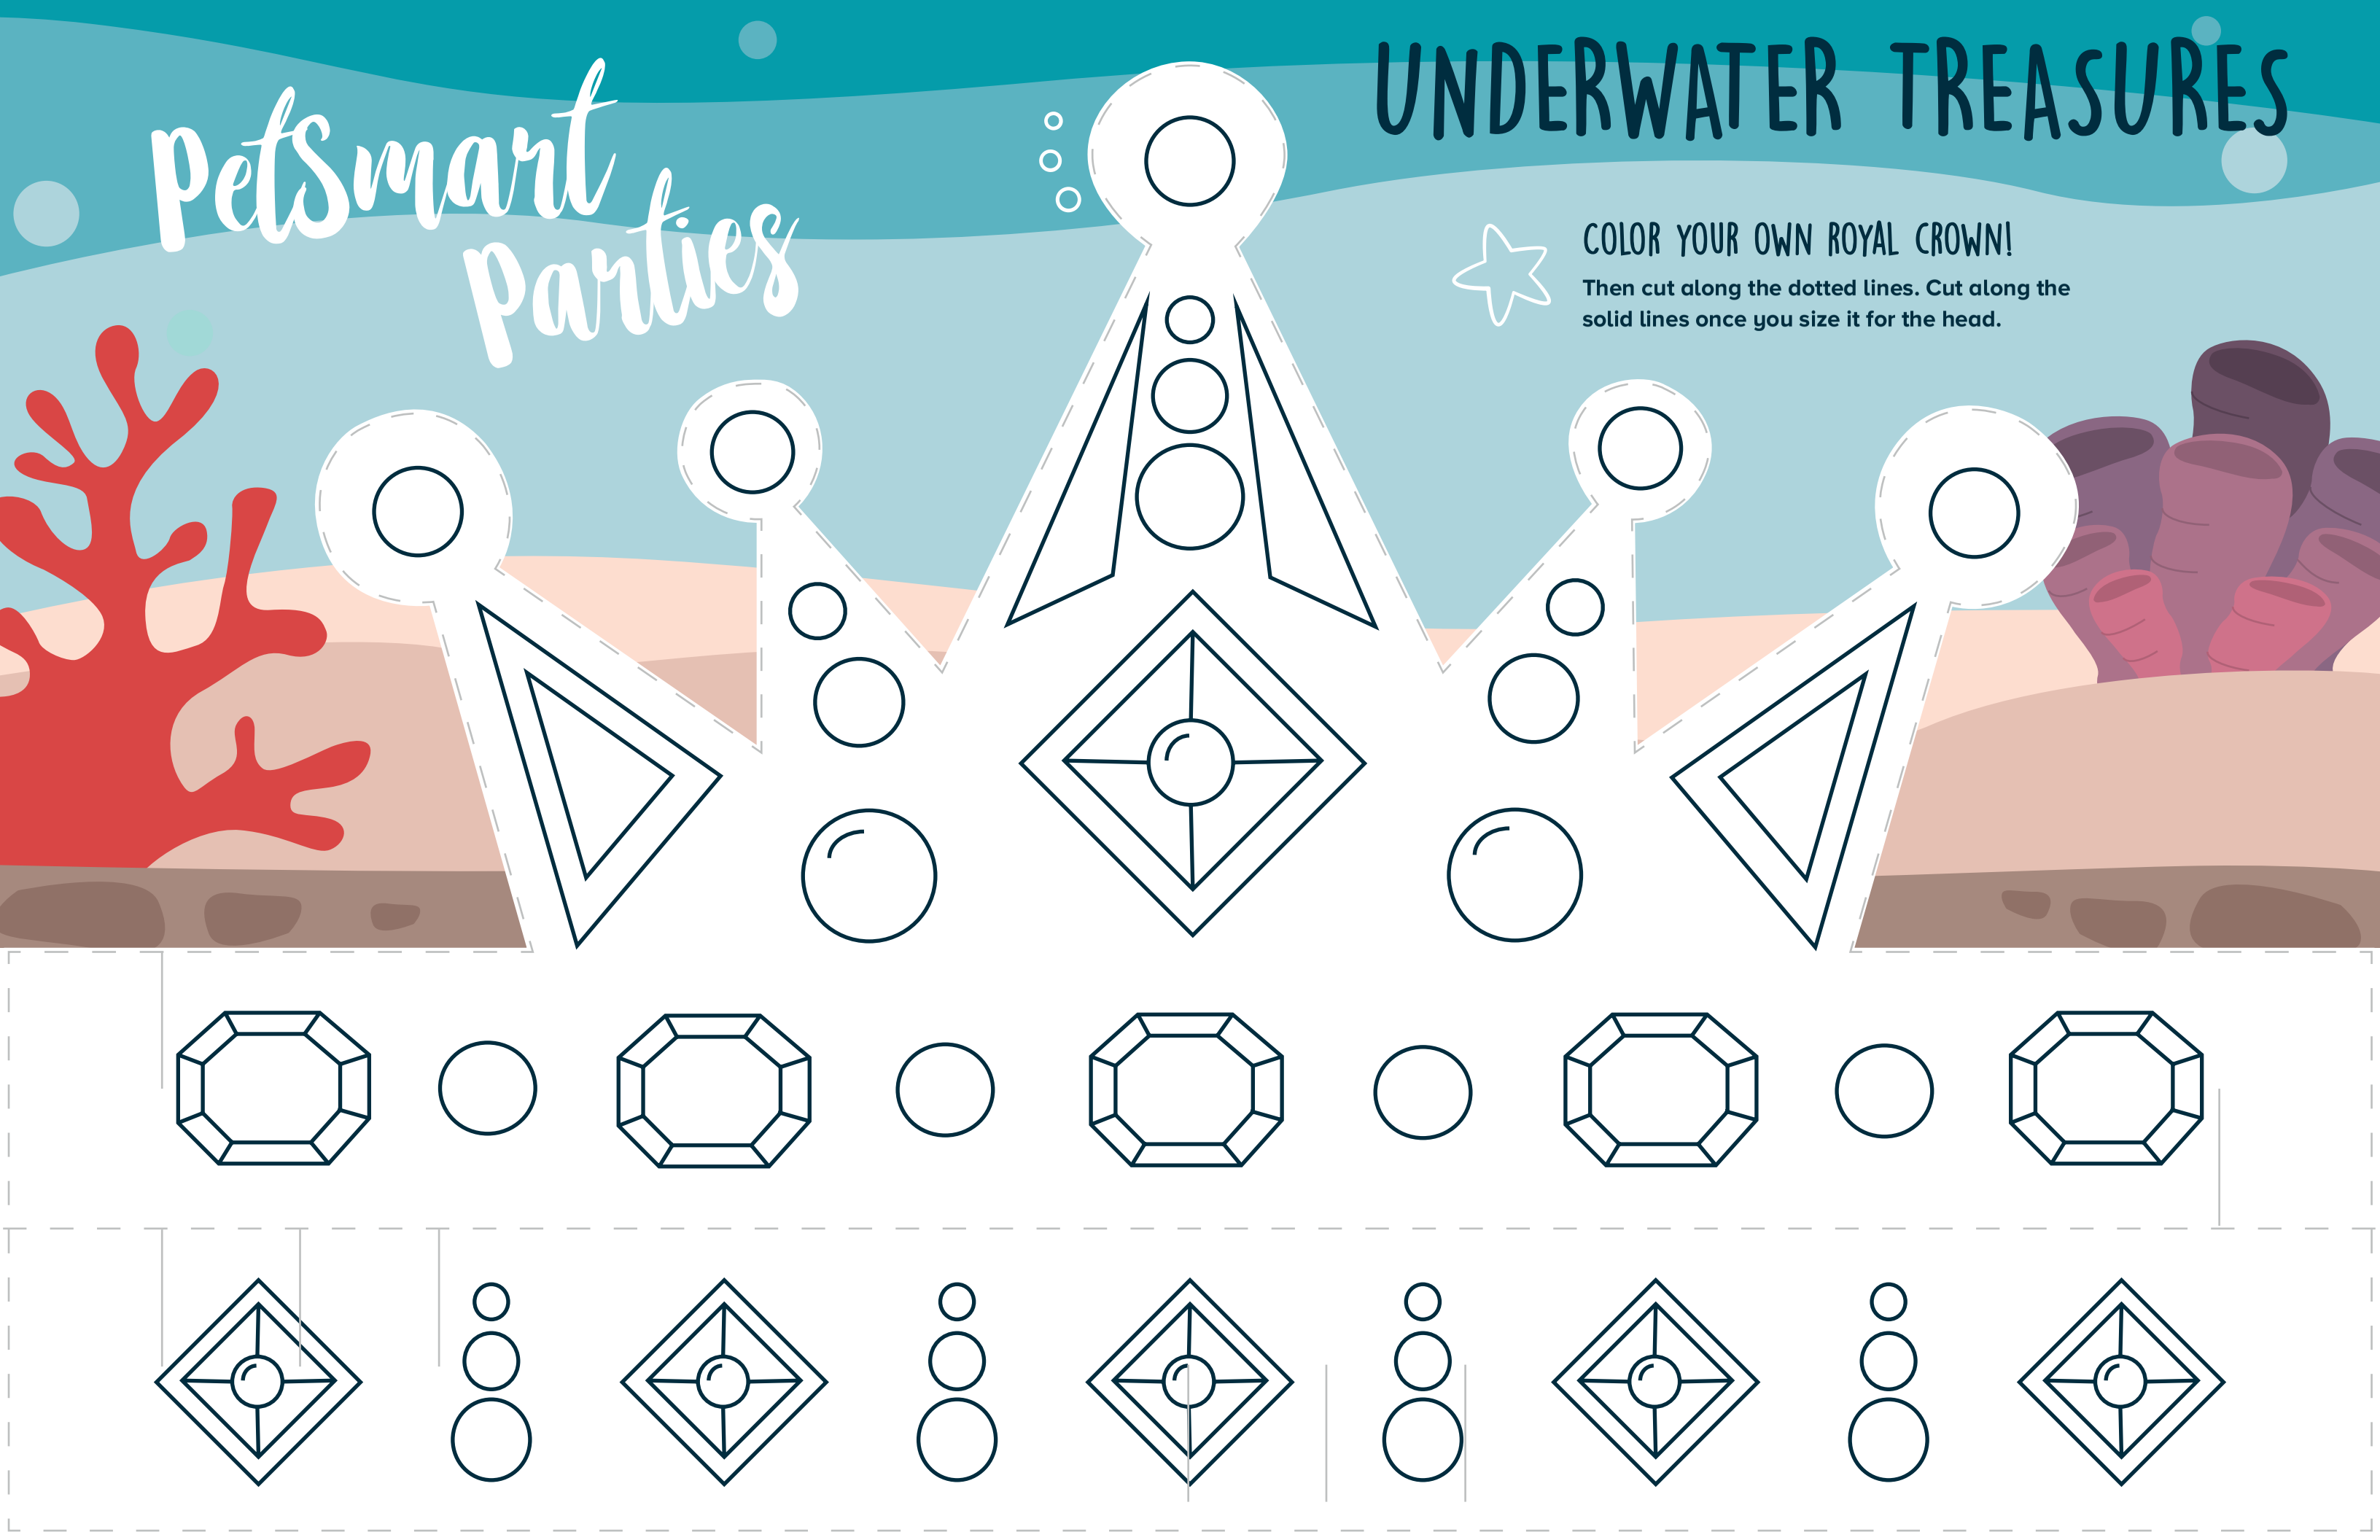

- ☐ terrarium or starter kit
- ☐ screened lid
- ☐ rocks, branches & decor
- ☐ hygrometer-thermometer
- ☐ heat lamp and UVB light
- ☐ food and water dish
- ☐ food, treats and supplements
- ☐ reptile carpet and/or bedding

UNDERWATER TREASURES

COLOR YOUR OWN ROYAL CROWN!

Then cut along the dotted lines. Cut along the solid lines once you size it for the head.

ALL HAIL FUN FISH FACTS!

FISH HAVE NO EYELIDS

FISH HAVE BEEN AROUND FOR 500 MILLION YEARS, THAT'S LONGER THAN DINOSAURS

MOST FISH CAN'T SWIM BACKWARDS

LEARN ABOUT YOUR ROYAL SUBJECTS

AFRICAN CICHLIDS

African cichlids can play nice with fish their own size, but may eat any fish small enough to fit into their mouths.

FANCY GOLDFISH

Fancy goldfish were the first fish to become pets.

TROPICAL COMMUNITY FISH

Mollies, platys, and guppies don't lay eggs like other fish. they give birth to little fish babies that can swim around right away!

BETTAS

Bettas can breathe by gulping air from the water's surface.

ALGAE EATERS

Algae eaters are fish that swim at the bottom of your aquarium. They stick to plants and walls using their sucker mouths.
